Results-driven Senior Cloud Engineer with 6+ years of experience in backend development, distributed systems and cloud native solutions. Proven track record in designing scalable microservices, optimizing deployment workflows across multi-cloud environments, and leading cross-functional teams. Passionate about infrastructure automation, modern DevOps practices, and mentoring for engineering excellence.

EMPLOYMENT

Senior Cloud Engineer	Teradata Corporation	Feb 2025 - Present
- Developed Bring Your Own Analytics (BYOA) workflows on Vantage Cloud Lake, integrating third-party tools and optimizing AI/ML workflows, boosting adoption by 25%. - Developed Containerized server hosted on Analytic Compute Servers to access S3/object stores. - Orchestrated analytics workloads with Kubernetes and Docker, ensuring scalability, security, and automation across multi-cloud environments. - Designed and implemented distributed workload orchestration on the Open Analytic Framework (OAF) using Ray, enabling scalable, fault-tolerant execution of AI/ML and analytics workloads.		
Software Engineer	Veritas Technologies LLC	April 2022 – Feb 2025
- Improved Kubernetes onboarding by 2x through roadmap contributions for InfoScale Operator. - Developed CSI Plugin for persistent volumes and volume sets provisioning. - Automated Helm-based deployments and containerized volume services for OpenShift environments. - Presented customized solutions to clients, led knowledge transfers, and mentored interns and junior engineers on Kubernetes and RESTful API design. - Served as Scrum Master, actively participated in code reviews to enhance team collaboration, code quality. - Mentored final-year B.Tech students, providing guidance and support on their projects.		
Associate Software Engineer	Veritas Technologies LLC	July 2020 – March 2022
- Designed REST APIs to orchestrate storage operations in VxVM, improving async performance by 40% - Reduced regression failures by 25% by fixing automation coverage gaps and flakiness in Jenkins pipelines - Wrote internal and customer-facing documentation to streamline team adoption and onboarding. - Collaborated across the VxVM, CSI, and platform teams to align roadmap features and support enterprise customizations		
Software Development Intern	Veritas Technologies LLC	Jan 2020 - June 2020
Implemented and simulated an erasure coding rebalance algorithm in Python for various disk configurations as part of the InfoScale SDS team.		
Summer Intern	FinIQ Consulting Pvt. Ltd.	May 2019 - June 2019
Developed ML models to predict stock price trends using moving averages and Bollinger bands.		

LANGUAGES AND TECHNOLOGIES

- Languages: Golang, Python, Shell, C, Java
- Cloud & DevOps: AWS, Kubernetes, OpenShift, Helm, Docker, CI/CD, REST APIs
- Infrastructure: Kubernetes Operators, Storage, CSI Plugins
- Operating System & Tools: Linux, Git, Jira, Confluence
- Database/Analytics: SQL, Vantage Cloud Lake
- Methodologies: Agile, Scrum, Microservices, Distributed Systems

EDUCATION

BITS Pilani

Dec 2021 – Dec 2023

- MTech in Software Systems, CGPA: 8.77/10

College of Engineering, Pune

Aug 2017 - Aug 2020

- B.Tech. in Information Technology.
- “Best Outgoing Sports Person 2020”

Government Polytechnic, Nashik

June 2014 - May 2017

- Diploma in Information Technology. Percentile: 93.69%
- Maharashtra State Rank 2 | “Best Outgoing Student 2017”

PROJECTS

Simulate Veritas erasure coding volume rebalance algorithm | Python, Kernel programming
Develop a simulation framework in Python to mimic the rebalance algorithm.

Online Examination System | Java, Hibernate, Swing, JSP
Designed a system for conducting online examinations at Government Polytechnic Nashik.

Develop the site of annual sports fest of COEP | Bootstrap, HTML, PHP
Created a website to showcase and manage entries for various events at the COEP ZEST sports fest.

ACHIEVEMENTS AND RESPONSIBILITIES

- Won Veritas Technical Fest Illuminate 2022 title, successfully managed and hosted the technical event.
- Veritas WOW Awards (Level 1, 2 & 3) for creating customer value, innovation, timely delivery and addressing QA gaps.
- Represented country/state in fencing, table tennis, badminton, cricket, baseball
- Led student placements and technical fests at COEP, coordinated at Smart India Hackathon
