

Jaya Raju

Senior Faculty & Mentor – Data Science & AI

+919632011983 ◇ jayamanoj.cse@gmail.com ◇ India ◇ [LinkedIn](#)

SUMMARY

Dynamic and results-driven educator, mentor, and data science professional with over 20 years of experience in academia. Proven expertise in teaching core computer science courses, Python, SQL, Machine Learning (ML), Data Engineering, and Business Intelligence (Tableau, Power BI), blockchain technologies to graduate and postgraduate students. Adept at curriculum development, faculty mentoring, and integrating GenAI tools for enhanced learning. Passionate about research and have published 35+ papers in reputed journals. Experienced in guiding Ph.D scholars, mentoring industry-relevant projects, and preparing students for high-impact careers in AI, ML, and Data Science.

WORK EXPERIENCE

Faculty

Nov '21 — Present

Great Learning

Bengaluru, India

- Teach core subjects including Python, SQL, ML, Bigdata Technologies, Explainable AI, Tableau, Power BI, Research Methodology and Business communications to MTech and MBA learners from diverse professional backgrounds.
- Design and implement customized learning plans, hands-on projects, and real-world applications to improve student engagement and course completion rates.
- Mentor students on industry-relevant projects, guiding them through ideation, execution, and successful completion, resulting in higher-quality project deliverables and publications.
- Train faculty members in modern data science and ML teaching methodologies, introducing best practices and pedagogical techniques for enhanced student learning outcomes.
- Develop and update curriculum to align with fast-evolving AI/ML industry standards, ensuring graduates are job-ready and equipped with the latest technological advancements.
- Leverage GenAI tools like ChatGPT, Bard, and Claude for interactive learning, automated assessments, and personalized feedback, significantly improving learning efficiency and assessment accuracy.

International Adjunct Faculty

Dec '22 — Present

Northwestern University

United States

- Teach database technologies and data engineering principles to international students pursuing their Master's degree.
- Develop structured course modules, integrate case studies, and introduce real-world applications to bridge the gap between theoretical knowledge and industry requirements.
- Mentor students in real-world projects involving database administration, scalability, performance tuning, and data processing, utilizing PostgreSQL, MongoDB, EdgeDB, Docker, GoLang, and REST API integrations.
- Successfully adapted to international academic standards, designing coursework that balances foundational theory with practical applications, enhancing student learning outcomes.

Assistant Professor/Sr Assistant Professor/Associate Professor

Jul '11 — Nov '21

New Horizon College of Engineering

India

- Taught and designed core computer science subjects including Machine Learning, Databases, Data Science, Blockchain, and Automation Testing.
- Led graduate and postgraduate research projects, resulting in increased student publications in reputed journals.
- Assisted in placement activities by conducting technical training sessions, mock interviews, and career guidance workshops, improving student employability rates.
- Served as a Board of Examination (BoE) and Board of Studies (BoS) member, ensuring curriculum relevance and maintaining high academic standards.
- Played a key role in securing NBA and NAAC accreditation by handling documentation, curriculum mapping, and compliance submissions.
- Coordinated conferences, faculty development programs (FDPs), and workshops on AI, ML, and emerging technologies, enhancing research capabilities and institutional reputation.

Asst.Professor

Jun '09 — Apr '11

RMK College of Engineering and Technology

India

- Delivered structured course content on core computer science subjects, improving student comprehension and problem-solving skills.
- Mentored graduate projects, helping students gain industry exposure and hands-on experience in real-world applications.

Lecturer

Jun '05 — Jun '09

Sona College of Technology, Salem.

India

- Developed engaging lectures, hands-on labs, and real-world case studies to strengthen student learning outcomes.
- Designed innovative teaching methods to enhance critical thinking and problem-solving skills among students.
- Mentored students in research-based projects, fostering a strong foundation in advanced computer science concepts.

EDUCATION

Ph.D (Computer Science and Engg) , ACS College of Engineering, VTU	2015 — 2020 India
M.E. (Computer Science and Engg) , Sona College of Technology, Anna University, Coimbatore	2007 — 2010 India
B.E. (Information Technology) , Sona College of Technology, Periyar University	1999 — 2003 India

CERTIFICATIONS

Completed Microsoft Certified: Azure AI Fundamentals
Completed ChatGPT Prompt Engineering for Developers from deeplearning.ai
Completed Tableau for beginners from Great Learning
Completed Certified Data Scientist course from Datamites, Bangalore
Completed Internshala training on Data science
Completed course on Data science with python from Great Learning
Completed NPTEL course Python for Data Science and Coursera course on Python
Completed course on Blockchain Basics from Coursera
Completed NPTEL course Big Data Analytics for Smart Grid
Completed course Code your own cryptocurrency from Udemy
Completed course Selenium web driver from Udemy

ACHIEVEMENTS & IMPACT

Successfully mentored students leading to high placement rates and industry readiness.
Introduced innovative teaching techniques, increasing student engagement and course completion rates.
Developed AI-driven assessment methodologies, reducing grading workload and improving evaluation accuracy.
Enhanced institutional reputation through research publications, accreditation contributions, and industry collaborations.
Received the Vedant Educator Excellence Award in 2020 from the Vedant Foundation.
Served as a keynote speaker and session chair for multiple international conferences.
Given many invited talks/workshop on AI/ML, BI Tools, Blockchain to many colleges.
Receiving excellent ratings from students and department heads.

SKILLS

Data Science & AI Data Science & Machine Learning, AI & Deep Learning, ML & AI Tools
Programming & Databases Python, Java, Golang, SQL (PostgreSQL, MySQL), NoSQL (MongoDB, Cassandra, Neo4j)
Data Engineering Big Data & Pipeline Technologies, Cloud & Data Storage
Business Intelligence BI & Reporting (Power BI, Tableau), Data Storytelling & Dashboards
Education & Mentorship Curriculum Development & Instructional Design, Faculty & Student Mentorship, AI-driven Learning Management Systems
Languages English, Tamil, Kannada

ACADEMIC & INDUSTRY CONTRIBUTIONS

Designed and set up industry labs for Big Data and Blockchain technologies, bridging the gap between academia and industry.
Developed AI & ML-driven assessments and evaluation techniques to improve fairness and efficiency in grading.
Conducted faculty training programs, enhancing teaching methodologies for AI, ML, and Data Science subjects.
Organized international conferences, workshops, and FDPs to promote knowledge-sharing and research collaborations.

PUBLICATIONS

35+ research in reputed Scopus-indexed and IEEE journals
Guided Ph.D. scholars and graduate students in AI, ML, and Data Science research, leading to high-impact.

PREVIOUS WORK EXPERIENCE

Organization : CMR Institute of Technology
Designation : Asst. Professor
Duration : Jan 2014 to June 2014.
